III. CURRICULUM TRANSACTION

The group of experts who participated in the development of curriculum for Two Year B.Ed Programme felt that the following points are to be kept in mind to realize the objective of preparing quality Teachers to serve in school system with all required employable skills.

- 1. The primary aspect of this curriculum is mostly interactive in nature. The Student -teachers, Teacher Educators, (College Faculty), the Head of the Institution (Principal of the College) should work in tandem with proper interpersonal relationship. Mere lecturing does not help to transact the new curriculum. The teacher Educators have to create various innovative activities where in the student- teachers develop appropriate skills required for their effective teaching by performing different activities. Half of the time in the College of Education is to be used for instruction and the remaining half of the time is to be allocated to attend individual and group projects and activities, library including E-Library activities to inculcate the habit of self learning. Yoga and physical Education activities are to be regularly organized and evaluated under continuous and comprehensive evaluation (CCE). Apart from the above, internal assessment tests are to be conducted. Thus throughout the semester the process of Student teachers" participation in all the activities – cognitive related (Knowledge) conative / affective related (wisdom) and psychomotor related (performance) are to be assessed.
- 2. Out of two years of the programme duration, the student-teachers will be in the field (Schools and community) for 20 weeks i.e. for about 5 months. In a professional teacher preparation programme, field experience in school has to be a vital component as it provides a platform to integrate theory learnt to a real situation. The field experience intends to expand the competencies and skills which are essential for a teacher to serve as a facilitator of learning. During school visit, student teachers interact with the teachers, students, administrators and community including parents and try to understand the issues problems faced, which helps in their process of becoming a teacher. They are also exposed to multicultural context of our society, which has a strong influence on the school environment and its functioning. The practice teaching in real classroom

situations, student teachers are provided with opportunities to participate and organize various programmes which help to develop positive attitude, interest in teaching, abilities and appreciate teaching as a profession. The Teacher Educator should monitor the activities regularly assigned to the student-teachers. These activities are also to be evaluated by the Teacher Educators. To fulfil all these and to realise the objectives of 2 Year B.Ed Programme the first and the foremost prerequisite condition is that both the faculty and student- teachers should be regular and punctual throughout the course duration of the programme.

- 3. It is also necessary to get the support from the State department of School Education to allow student –teachers to participate in all functional activities of the school, from assembly prayer to the long bell in the evening. If the school conducts remedial teaching classes for backward (academically) children after the school hours, the student teachers should associate in such activities too. In a word, the student teacher should feel that this period is apprentice ship for getting confidence in conducting all kinds of functional activities of the school under the guidance of the Head of the Institute, Subject-teachers (guide teachers) and teacher educators. In this regard the State Council of higher Education, will take appropriate action to see that the State Department of School Education issues appropriate orders to all the District Educational Officers in the State that no school should object the student-teachers to participate in school functional activities during their internship.
- 4. As the Head of the School (HM"s) and Guide Teachers (School Teachers) are also involved in assessing the performance of student-teachers along with teacher educators (college teachers). Further, there should be complete harmony among all these people and provide proper guidance to the student-teachers in shaping them as future teachers with more confidence and commitment. The 20 week period is very important in the sense that they learn many things practically and nullify the gap between theory and practice.

If all the concerned systematically transact on this Curriculum for 2 Year B.Ed Programme with a vision, we are sure to improve the quality of our school education in the years to come by having a well trained, effective and committed teachers in our schools.

IV. CONTINUOUS AND COMPREHENSIVE EVALUATION

Part A: Credits, Marks and Internal Assessment

The Two-Year B.Ed. Programme is aimed at bringing total change in student teachers – their attitude towards teaching profession, children, school, community and society as a whole, their personality, behavior, communication skills, innovation and other life skills. Hence, it is proposed to implement Cumulative Grade Point Average (CGPA) in continuous evaluation system of Two-Year B.Ed. Programme.

There are 17 courses mentioned earlier, out of which 5 courses are with 4 credits and the remaining 12 courses with 2 credits. The courses with 4 credits carry 100 marks each, out of which 20 marks for internal assessment and 80 marks are earmarked for semester-end examinations conducted by the university and the courses with 2 credits carry 50 marks each, 10 marks for internal assessment and 40 marks for semester-end examinations. Thus the total credits for theory examinations in all the four semesters put together is 44 and 1100 marks.

Under the practicum – activities, group and individual projects, reports and records, etc. carry 17 credits (1 credit in each course). The total marks for about 80-85 activities relating to 17 courses offered in B.Ed. programme carry 425 marks –in Semester-I 100 marks, in Semester-II 125 marks, in Semester-III 100 marks and in Semester-IV 100 marks. Thus, the practical component in Semester-I carries 4 credits and 100 marks.

During Semester-II each student teacher has to practice 5 Micro Lessons (for 25 marks) in each methodology subject in the college, which will be assessed by the respective methodology teacher educator the weightage is (1+1) 2 credit covers 50 marks for two pedagogy subjects. In Semester-II, the student teachers will be provided school experience for four weeks, in which they have to observe 5 lessons given by the regular school teachers under each pedagogy subject and prepare two observation records which carry (1+1) 2 credits (50 marks). Further, they have to prepare a school record which carries 1 credit (25 marks). Thus, the total practical component in Semester-II carries 10 credits and 250 marks.

During Semester-III, the student teachers will be attached to schools for a period of 8 weeks. During this period they have to do teaching practice by completing 20 lessons in each methodology for 6th and 7th Classes. These lessons are observed by the (guide) teachers and one of the faculty members of the college of education. The teaching practice record is to be submitted by the student to the college with the signatures of the guide teacher at the end of each lesson. The performance assessment of the student teacher will be done for 100 marks in which the guide teacher for 40 marks, the teacher educator for 40 marks and the Head of the School for 20 Marks. The methodology teacher has to consolidate these marks and submit to the Principal of the College with the signatures of all the three mentioned above. Apart from teaching practice, the student teachers have to observe 5 lessons in each methodology given by their peer student teachers and prepare two observation records, which will carry (1+1) 2 credits and 50 marks. Thus, the total practical component in Semester-III with 14 credits covers 350 marks.

In Semester-IV, the student teachers are attached to schools for another period of 8 weeks. During this period, the student teachers have to undertake teaching practice by giving 20 lessons in each methodology for 8th, 9th and 10th (if possible) Classes. These lessons are observed by the guide teachers and one of the faculty members of the college if eduaction. The teaching practice record is to be submitted by the student to the college with the signatures of the guide teacher at the end of each lesson. The performance assessment of the student teacher will be done for 100 marks in which the guide teacher for 40 marks, the teacher educator for 40 marks and the Head of the School for 20 Marks. The methodology teacher has to consolidate these marks and submit to the Principal of the College with the signatures of all the three mentioned above. Further, the student teachers have to give two final lessons for the purpose of Practical Examination, one in each methodology in the school other than where they had school internship. These lessons will be assessed by the concerned methodology teacher educator and the senior subject teacher in the school independently for 25 marks each. These two lists will be submitted to the Principal of the College, who will consolidate practical examination marks for all the students in the college. Thus, the total practical component in Semester-IV with 16 credits carries 400 marks.

On the whole, the practical component in the Two-Year B.Ed. Programme carries 44 credits and 1100 marks. The marks awarded under internal assessment and practical component in every semester are subject to moderation. The University shall take necessary steps to constitute the Moderation Board/s formulating appropriate guidelines to carry on moderation.

Part B: Grades, Credits, SGPA and CGPA

After receiving the marks of the student teachers from the Principals of Colleges of Education through the Chairperson, Board of Studies in Education for B.Ed., the Examination Branch of the University shall prepare Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA) Memos by incorporating the marks obtained by the students in the semester end university examinations as described below. As 40% is the minimum required for pass in the examinations, the student teachers should obtain at least 32 marks (out of 80) in courses which carry 100 marks and 16 marks (out of 40) in courses which carry 50 marks in the University examinations. However, there is no minimum for internal assessment.

In preparation of Question Papers for the University Examinations, the Question Paper setter should be instructed to set Four Short Answer Questions from Each Unit in case of courses which carry 80 marks and Two Short Answer Questions from Each Unit in case of courses which carry 40 marks as the syllabus of all the courses is consisting of five units. The Essay Type of Questions can be distributed over these five units. The Model Questions Papers are given below.

After obtaining the marks from University Examinations, tabulation of marks should be commenced to get the total marks obtained in each course including internal assessment marks. The total marks thus obtained for each course will be converted into grade points as shown below.

Range of Total	Grade	Category
Marks Obtained	Points	
> 90	10	О
80-89	9	A
70-79	8	В
60-69	7	C
50-59	6	D
40-49	5	Е
< 40	FAIL	0

In case of courses, which carry 50 marks, may be multiplied with 2 to fit into the grade point table shown above. Under the practical component also similar principal may be followed either by enhancing / reducing the marks to hundred for conversion of marks into grade points. For example, in some cases the total marks may be 25, which is to be raised to 100 by multiplying with 4 and convert the marks into grade. Similarly if the total marks for a practical component is 50, which is to be raised to 100 by multiplying with 2 and convert the marks into grade. In case of 125 marks, it is reduced to 100 by multiplying with 4/5 and convert the marks into grade.

As the credits are already fixed by the expert committee for all the theory courses and all aspects under practicum as mentioned under Scheme and Structure of the Two Year B.Ed. Programme, it will be very easy now to prepare the SGPA memos for the student teachers as illustrated below.

VI. STEPS TO BE TAKEN FOR QUALITATIVE IMPROVEMENT IN TEACHER EDUCATION PROGRAMMES

While developing Curriculum for Two Year B.Ed. Programme to be offered in all the universities in the State of Andhra Pradesh, the experts involved in the process of curriculum development suggested the following strategies for its effective implementation. This in turn will enable us to prepare the competent, committed and quality teachers for our school system. Any lapse or lenience on part of the apex bodies and the Government departments on teacher education ultimately result in the preparation of poor quality teachers who will be a burden not only to the future of the children but also they may contribute to the collapse of the future society. Therefore, the APSCHE, the Department of School Education, Govt. of Andhra Pradesh and the affiliating Universities should work together and see that the following suggestions are implemented. Otherwise, mere prescription of the revised curriculum may not result in the preparation of the teachers with required quality with professional commitment.

- ➤ The Government of Andhra Pradesh should immediately conduct man power planning in order to assess the requirement of teachers at different levels of schooling for the coming two decades and accordingly the establishment of teacher education institutions are to be regulated.
- ➤ The Govt. of AP should promulgate a moratorium on the establishment of new teacher education institutions rather focus should be on the consolidation and improvement of existing teacher education institutions
- > Stringent measures are to be initiated so as to plug the commercialization in teacher education
- All the affiliating universities in the state are to be advised to ensure whether the teacher education institutions in their jurisdictional area are functioning with required number of qualified teacher educators, besides required infrastructural facilities as stipulated in the norms and standards of the NCTE.
- ➤ The affiliating universities should develop appropriate mechanism (such as biometric) to ensure regularity of teaching faculty and student teachers in the colleges of education
- ➤ The practice teaching and the student internship are the two vital aspects of teacher education programmes. The success of these much depends upon the cooperation extended by the District Educational Officers and the Teachers/ Head

Teachers working in the cooperating schools. Therefore appropriate orders are to be issued by the state department of School Education to all their subordinate officers to extend all the cooperation and also direct them to monitor the school experience programmes of the student teachers taking place in the schools under their administrative control.

- ➤ The APSCHE should organize a meeting with the Director, Telugu Akademy and other prominent publishers in Education to develop relevant Text Books on different courses (subjects) included in this Two Year B.Ed. Programme. This kind of act will discourage the cheap material which may flood into the market in the name of guides/ examination material, etc.
- ➤ For the effective implementation of the new syllabus, series of workshops for the faculty of colleges of education are to be organized by the affiliating universities. The APSCHE can also organize state level workshops in this respect.
- In order to sustain the quality in teacher education offered in the state of Andhra Pradesh, the admissions are to be restricted to the graduates coming from the erstwhile state of Andhra Pradesh. More particularly, students coming from Odisha, West Bengal, Bihar, etc. are to be restricted from enrolling them into our B.Ed. programme.
- The APSCHE should monitor the academic performance of teacher education institutions and grade the institutions as it is done in the case of Engineering Colleges. If there are any erring institutions, the matter may be informed to the SRC-NCTE, Bangalore for withdrawal of recognition by informing the affiliating university.
- ➤ The APSCHE should convince the Govt. of Andhra Pradesh and ensure the sanction of additional teaching positions required as per the norms of NCTE in the University Departments of Education, Govt. Colleges of Education and Aided Colleges of Education so as to implement the revised Two Year B.Ed. curriculum effectively.
